Washington, DC 20585

Re: Mid-Atlantic Area National Corridor
Att: Docket No. 2007-0E-01

As a resident of the Commonwealth strongly concerned about the effects of this corridor designation, I request rehearing and ask that the Department of Energy reconsider its designation of the Mid-Atlantic Area National Corridor. The corridor designation ignored written comments and oral testimony of hundreds of individuals objecting to the proposed designation. Rehearing will allow concerned citizens the opportunity to fully express their concerns about the negative effects on local land-use planning, environmental and historic resources and the Virginia Energy Plan. Utilities should be required to show that they are developing balanced electrical solutions that consider conservation, additional generation and demand response along with new transmission lines.

Thank you.
