Washington, DC 20585

Attn: Docket No. 2007-OE-01

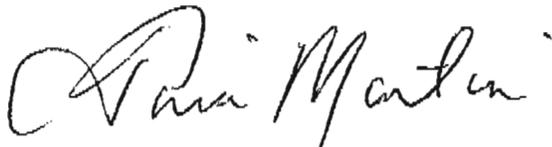

Dear Sir:

I am extremely concerned and disappointed regarding the Department of Energy's ruling to approve the Mid-Atlantic Area National Corridor. I believe the Department has not completely discovered and investigated all the public concerns and negative impact that Washington County and many other areas will suffer due to the proposed high voltage power lines and towers.

There has been such strong opposition from federal, local and state government officials and a huge public outcry of opposition with regards to the (NIETC), specifically, the Mid-Atlantic corridor I can not understand how you can proceed with your plans as they are.

For this reason, I am requesting a rehearing of the order in Docket NO. 2007- OE - 01

Sincerely,

Tina A. Martin
